Important customer information concerning the expiry date of gDNA-, cfDNA-, cfDNA in plasma-, plasma- and FFPE-products

Dear customers,

we are pleased to inform you about an important change of our gDNA-, cfDNA-, cfDNA in plasma-, plasma- and FFPE-products. The results of our stability studies according to the requirements of DIN EN ISO 23640:2015-12 (shelf life testing of reagents for in vitro diagnostic use) allow us to extend the shelf life of product groups mentioned above.

If you have any questions about the shelf life of any of your already purchased products, please feel free to contact us (info@sens-id.com). Of course, you will also find the updated certificates of analysis on our webpage (<https://www.sens-id.com/de/>).

Certainly, the shelf life of 24 months applies also to future new developments or customised products for your needs. Please do not hesitate to contact us if you have any questions or feedback. We look forward to discuss your ideas and requirements with you and are always available for you.

Sincerely yours

Andreas Bollmann - Regulatory Affairs Manager
